

CES-FR-Buildings

Fire Rated Storage Buildings

Stores:

- Pesticides
- Fertilizers
- Gasoline
- Diesel
- Propane
- Batteries
- Wastes
- Oil
- Hydraulic Fluids
- Paints
- Oxygen
- Chlorine
- Fungicides
- And More

Modular Space Saving Design:

Core fire-rated storage buildings are designed for the storage of flammables, combustibles, corrosives, chemicals, acids and pesticides. These FM approved buildings are fire-rated for 2 hours (combustible buildings available). The modular design allows for double stacking of 55 gallon drums providing nearly twice the space of traditional freestanding buildings. Two part coatings keep the interior building close to ambient temperature (R11 insulation also available).

- FM Approved
- 2 Hour Fire Rated
- Single or Double Stack 55 Gallon Drums
